MATERIALS		
Aluminum	A	A chemical element that does not exist in a pure state in nature, aluminum is a malleable and ductile metal with strong resistance to corrosion and oxidation, thus used in multiple applications in the production of outdoor furnishings. Our products are designed and fabricated through the careful selection of alloy materials and their chemical composition to produce a product guaranteed for optimal performance. Our aluminum finishes come in different appearances depending on the product: powder coated, lacquered, brushed, polished (shiny) or matte (non-shiny). Please refer to our price list or website for each items' surface details.
All Weather Wicker	AWW	Synthetic all-weather wicker used in our products consists of either a fiber thread or a metal wire surrounded by thermoplastic polymers. Additives further improve the performance levels of this material, ensuring resistance to weathering, UV light and heat. This material is woven by hand on each item and worked with ancient craft traditions. We offer different colors of synthetic wicker dependent on the item selected; Sid Grey (76) and Elly Grey (74)
Bamboo	BMB	Bamboo is a rapidly growing material which is collected without causing deforestation. After harvesting, the outermost layer is removed and the bamboo strips are modified using a special thermo-treatment process which increases the stability of the material, ensures protection of the materials against fungi and guarantees the highest durability possible.
Ceramic/Porcelain	CR	It has excellent physical and mechanical properties making it ideal for outdoor use since it is resistant to atmospheric corrosion and unaffected by UV exposure. Its qualities allow it to be water and oil repellent. On Quadro available in Salt (51) or Lead (53)
Electro Galvanized Steel	EGS	An immersion process which bonds a layer of zinc to steel in order to protect against corrosion. Only available on our Valles benches.
E-Coated Steel	ES	Steel is the main product in the Iron and Steel Industry. EMU uses an alloy of Steel, Carbon Fe37 and with the rich know-how of technological and innovative procedures of surface treatments creates pleasing outdoor products. In the first phase, the material is degreased and covered with a layer of phosphoric micro-crystalline that assists to create a high anti-corrosive performance. The second phase is varnishing with a process of cathode electrodeposition (cataphoresis) which is the most technologically advanced method of protecting the metal for the outdoor elements. This process is done via several dipping tanks with the effect of a continuous electric field assisting in the deposition of a coat of finish. This process we call "e-coat". The product is then colored by using a polyester powder coat to give its final appearance. EMU products made in steel are 100% recyclable at the end of their life cycle. EMU Steel products are available in a variety of powder coats, these colors can be found in the enclosed price list or on our website.
Ferrus Treated	FS	A treatment that guarantees a high resistance to rust, process performed on cast iron products to prevent corrosion. Available on most site furniture furnishings offered.
HPL/Compact Laminate	HPL	High Pressure Laminate is a self-supporting material suitable for outdoor exposure. It consists of layers of paper in between phenolic resins and a decorative surface layer on top and bottom. We offer different colors of decors dependent on the item selected. High pressure laminate table tops carry a two (2) Year Limited Warranty.
Eco-Leather	L	Made out of compacted Nylon microfiber in a polyurethane bath, then re-coated with polyurethane in the same color. On Terramare available in White (200/92), Brown (200/93) Grey/Green (200/94) or Black (200/95) as noted per item.
Natural Wood	NW	Garapa Tropical Wood treated with Lingus fungicide & insecticide, then water proofed. Natural wood stain.
Polyester Fabric Cushion	PFC	Cushions are made through a process of thermoforming and hot shearing. Both the polyester fabric for the top of the cushion and the non-slip underside fabric are each separately adhered to polyurethane rubber. Sides are then matched, inserted into a mold, and heated to 180 centigrade to seal them into a cushion. The edges are immediately sheared for a continuous seam with no stitches.
Recycled Polymer	POLY	Recycled Polymer is eco-friendly, it derives from recycled and recyclable material. The material does not crack, splinter, rot nor dry. It has high resistance to bad weather conditions and humidity, it is long-lasting.
Polypropylene+Fiberglass	PPL	It is a thermoplastic polymer, used in conjunction to another material for the frame of the product to be able to offer a pop of color to furniture. Different colors available on Dome, Milo and Olly items.
Synthetic Rope	R	Double braid with polyester core and multifilament propylene cover. The external fibre is weatherproof and resistant to UV rays. We offer different colors and sizes of Synthetic Rope dependent on the item selected.
EMU-TEX	T	Also known as Textilene, it is a technical fabric for outdoor use made with polyvinyl chloride thread. It features exceptional strength to ensure durability, maximum resistance to UV rays, the elements, humidity and sudden changes in temperature. We offer different colors of Emu-TEX dependent on the item selected.
Teak or Natural Teak	TK	Teak is an extremely long lasting hardwood with high oil content and is suitable for outdoor use without the necessity of a sealing treatment. If not treated, the teak turns into a silver-grey color. This is the natural protection from inside of the wood, which is considered an essential part of teak's charm; this does not weaken the wood. Please note that if not sealed, the surface is exposed to staining. Since both teak and ash are natural products, it is subject to color variations within the product that we cannot be held responsible for. Wood can also crack due to constant changes in weather conditions which is not covered under our warranty. emuamericas, llc does not warranty furniture finish when sealed or oiled; always follow the manufacturer's instructions for applications of sealers, cleaners or oil. Our teak is unfinished, it will grey over time and could stain if not sealed, joints may open due to weather conditions. Table tops carry a (1) Year Limited Warranty.
Tempered Glass	TG	Our tempered glass is manufactured in compliance to the international standards BS 7376 and complies with the international standard BS 6206. We offer different colors of tempered glass dependent on the item selected.
Wood-Look Aluminum	WLA	Aluminum slats that are "heat wrapped" with film to create a maintenance free wood look item. Available in Oak (401), Wenge (402), Grey (400), Walnut (409) or Driftwood (500) as noted per item.
Wood Plastic Composite	WPC	A composite material made from wood fibers and HDPE. Resistant to UV rays and humidity, the material requires little maintenance.

CORDING (SELECT MODELS ONLY)
 List prices DO NOT include any cording. Cording is available on select models & quantity at an additional charge, please inquire.

VINYL COM MATERIAL
 100% vinyl fabric is not recommended for our cushions. If 100% vinyl COM fabric is chosen, the customer must provide a sample of the fabric before order will be accepted. 100% vinyl fabric is difficult to work with and requires special equipment to manufacture our cushions. They also require a vent fabric to be installed, because full vinyl cushions do not allow air to escape when compressed, and can cause the seams to split. Vent fabric will also need to be provided by the customer. There will be a 20% upcharge on 100% vinyl cushions.

CUSHION DETAILS
 All cushions are custom orders. NO EXCHANGES/REFUNDS/RETURNS ALLOWED
 Warranty covers manufacturing defects such as seam failure for the period of (1) year from ship date
 Misuse, alteration, or damage by natural or man made environmental elements voids any warranties written or implied
 Wrong color, size, style, soiled product or cosmetic blemishes are warranted for a period of (5) days from the date of receipt
 Dependent on fabric chosen, lead time is from order confirmation date
 Freight chart not applicable to cushion orders. Please request freight quote
 Cushions will ship with furniture unless otherwise requested for an additional fee
 Color presented via swatches or website may vary to final fabric color due to dye lot production

Color presented via swatches or website may vary to final fabric color due to dye lot production

Fabric swatches may be seen at www.emuamericas.com or requested from emuamericas, llc

Umbrellas should be closed in moderate wind conditions; moderate wind on the Beaufort Scale means that wind is raising dust and lifts sheets of paper off the ground. Damage due to wind is not covered under warranty.

Periodic maintenance is required for all Shade products
