

Manhattan and Jardin

Manhattan Steel chairs were new for 2014 and the **Jardin** was new for 2015. A copy of the popular French 1930's originated "Tolix" chair, the Manhattan has enjoyed a renaissance recently. It took many factory visits over several years to find the quality of Manhattan chair that we would be proud to sell. Now we are bringing to market the best reproduction, with the best manufactured quality at the most reasonable prices possible.

Manhattan is being stocked in white, black, yellow, red, lime green and gun-metal grey as well as clear coated raw steel. The colors are Akzo-Nobel, powder-coated on a zinc prepared welded steel for long life exterior use. We are featuring side chairs, armchairs, and bar stools. We have added a barstool with the chair seat shape and a back to the line in 2015. Initially we will start with Gun metal only but will add colors as the market dictates. Additional styles of Manhattan such as Mid-Town, Downtown and Uptown were added for 2016. Note that ATC is the only company to provide a chair seat on a barstool with a back as every other offer is for the square backless barstool with a back added and the result is a stool really too small for American backsides.

The **Jardin** is also an iconic French design popular in parks and bistros for over a century. In bringing the Jardin to America, we are presenting zinc treated steel powder coated with a top quality outdoor powder-coating that completely envelopes the structure. We use heavier weight stamped steel slats rather than straight cut steel for added strength and rigidity as well as greater comfort since they are smooth and wider.

Relaxing at a bistro near the beach or dining at a small café in the city. The **Jardin** re-creates a classic look. Both tables and chairs fold compactly for storage. The folding tables and chairs are both portable and lightweight, making storing and transporting stress-free. The **Jardin** is great for seasonal operations as well as establishments that need extra seating since it is our least expensive chair and takes up little space for storage.

New for this year will be a galvanized steel chair line with a padded textilene seat and back and a side chair with a synthetic wood slat seat and back in pastel multi-colors. The Maldive is grey powder coated on galvanized steel tubing with a padded textilene back and plain seat. It comes as a stackable side and arm chair. The Largo is also textilene upholstered, galvanized steel chair that stacks and it is very comfortable and sturdy. The Maui is a side chair with slats made of a wood-resin mix in random, pastel grey family colors. All of them are very well priced and represent our style and value mission.
