Wood Products

Our Wood Products are made using the finest European Beech. Each item carries a 3 year Limited Structural Warranty*

- European beech is a “hard-wearing” wood. This generally means that items made of Beech can take a good amount of pressure over time. The hard surfaces will resist gouging and chipping better than some other woods.
- A relatively non-porous wood with a very strong surface which provides excellent durability in a commercial environment.
- It will often age gracefully. European Beech can maintain its look for many years, providing a natural, organic style.
- Commonly used for curved furniture pieces because of its relatively malleable qualities.

All Wood Products are made-to-order, assembled and finished at our factory in Addison, Illinois.
